# 2. Application Period and Selection Test

Application	<b>20</b> (Thu) – <b>31</b> (Mon) <b>July 2017</b>					
period:	X Must be either submitted in person from 9:00AM to 5:00PM in this period					
	(except for S	aturday, Sunday) or received via mail (postal service) by 31July				
	(Mon).					
Selection test	Engineering:	24 (Thu) August 2017				
date:	Science:	23 (Wed) – 24 (Thu) August 2017				
Result	1 September 2	<b>017</b> (Fri), 10:00AM				
notification:	The results will	be published in terms of registration number and put on the				
	notice boards of	f Main Buildings of the Faculty of Engineering and Faculty of				
	Science on the a	above date and time. At the same time, a 'Letter of Notification'				
	will be sent to t	the successful candidates. However, telephone or email inquiries				
	will not be enter	rtained.				
Admission	The admission t	formalities for the successful candidates will take place on				
formalities:	<b>4</b> (Mon) – <b>8</b> (Fr	i) September 2017.

Tel.: 089-927 9546

#### 3. Application Eligibility

An applicant to this program must be a non-Japanese national eligible to stay in Japan as a student under the state regulations of immigration and refugee control, and must meet one of the following requirements.

- (1) Must have acquired or should be expecting to acquire by **September 2017** a bachelor degree.
- (2) An applicant, who has had formal education outside Japan, must have completed 16 years of formal education and have or should be expecting by **September 2017** a Bachelor's Degree.
- (3) Those who have earned or expect to earn by **September 2017**, a bachelor's degree or equivalent by completing an academic program of 3 years or more at a foreign university or foreign educational institution (limited to the institutions whose overall quality of education and research has been evaluated by an external body certified by the country's government or its related agency, or the institutions designated as equivalent by the Minister of \*MEXT).
- (4) An applicant, who has had formal education outside Japan, must have completed 15 years of course-based education with excellent grades and must be recognized by the Graduate School as eligible to apply for the program.
- (5) Recognized by the Graduate School through a separate evaluation for admission eligibility as being in possession of academic abilities equivalent to or greater than those of a bachelor degree holder, and must be 22 years old or above at the time of admission.

\*MEXT=Ministry of Education, Culture, Sports, Science and Technology

(*Note:* If you meet one of the above conditions, please communicate with the Graduate School Office (if you meet requirement (4) or (5) please contact the Graduate School Office by 9 (Fri) June 2017) before sending us your application documents.)

#### (Pre-application Admission Eligibility Assessment for Requirement#4 above)

An applicant willing to apply to this program under the Application Eligibility requirement (4) above must also submit/send the following documents in addition to the documents listed on page 4 of this 'Application Guidelines' to the address given on page 1 by the application deadline.

① Documents to be submitted/sent:

Letter of	Officially sealed Letter of Recommendation prepared by the
Recommendation	college/university attended (provided with the application material;
	<i>Form#2</i> )
Grade Sheet/s or	Officially sealed copies of grade sheets or transcripts of courses
Transcript	attended, issued by the university or college of affiliation; with clear
	indication of compulsory subjects as well as all other subjects attended
	up until 3 <sup>rd</sup> year or 6 <sup>th</sup> semester of the course and the corresponding
	credit hours
Course curriculum	The course curriculum details of the subjects attended at the
of the	college/university of the applicant's affiliation
college/university	
attended	

 Submission deadline: 16 June 2017 (Fri) Must be either submitted in person from 9:00AM to 5:00PM on weekdays, or received via mail (postal service) by 16 June 2017 (Fri).

#### (Pre-application Admission Eligibility Assessment for Requirement#5 above)

An applicant willing to apply to this program under the Application Eligibility requirement (5) above must submit/send the following documents to the address given on page 1 of this 'Application Guidelines' by the deadline below.

- ① Documents to be submitted/sent:
  - 1) Admission eligibility assessment sheet (provided with the application material; Form#3)
  - Reason for admission eligibility assessment request (*provided with the application material*; *Form#4*)
  - 3) Bachelor or Master Degree/Graduation Certificate obtained from the last-attended college or university
  - 4) Other reference materials for evaluation (such as, research paper/s, patent certificate/s, etc.)
  - 5) Self-addressed return envelope affixed with an 82-yen stamp (for notifying the result of application eligibility assessment)
- ② Submission deadline: 16 June 2017 (Fri)

Must be either submitted in person from 9:00AM to 5:00PM on weekdays, or received via mail (postal service) by 16 June 2017 (Fri).

③ Admission eligibility assessment:

The admission eligibility assessment will be conducted on the basis of the submitted/sent documents, and the applicant will be notified of the result by **17 July 2017** (Mon). Please note that the submitted/sent documents will not be returned in any case, but if the admission eligibility is accepted, the applicant will have to submit all required documents listed on page 4 of this 'Application Guidelines.' Moreover, the result of this particular admission eligibility assessment will only remain valid for an application to **2017** Selection Program.

#### 4. Selection Procedure

The selection for admission will be made on the basis of assessment of submitted documents and performance in interview (including an oral test). Applicants for the School of Science must also complete a written examination. The details of the interview and written test are given in the following table.

	Date (day)	Interview and written test	Course	Time
		subjects		
School of Engineering	<b>24 August</b> (Thu)	Interview (including Oral Test) only	<ul> <li>Mechanical Engineering</li> <li>Civil and Environmental Engineering</li> <li>Materials Science and Engineering</li> <li>Applied Chemistry</li> <li>Electrical and Electronic Engineering</li> <li>Computer Science</li> </ul>	13:00 ~
	Place	Faculty of Engineering, Ehi	me University	
		3 Bunkyo-cho, Matsuyama	City	
<sup>§</sup> Appl	icants interested in th	e 'Civil and Environmental Engine	eering or Electrical and Electronic Er	ngineering' course
must	communicate with the	e each Department Chair from 19 J	une (Mon) to 30 June (Fri) 2017.	
<communication address=""></communication>				
Civil and Environmental Engineering : hinata.hirofumi.dv@ehime-u.ac.jp				
Electrical and Electronic Engineering : okamoto.yoshihiro.mj@ehime-u.ac.jp				
(Not	e: The details of t	he interview will be explained	ed on the day of the entrance to	est.)

(	(

		2-5 Bur	nkyo-cho, Matsuyan	na City	

\*The extent of questions in specialized subjects of each course is given on Page 7 of this guideline.

\*\* There is no English examination in the 'Earth's Evolution and Environmental' course and 'Biology and Environmental Science' course, as we use converted scores of the TOEIC or TOEFL iBT.

(Note: The details of the interview will be explained on the day of the entrance test.)

#### 5. Application Material and Documents to be Submitted

- (1) Application form (including Personal Identification Card and Admission Card) (*provided* with the application material; Form#1)
- (2) Officially sealed copies of Grade Sheet/s or Transcript/s of Bachelor Degree course officially issued by the graduating university or college
- (3) Bachelor Degree Certificate or Certificate of expected date of graduation officially issued by the graduating university or college
- (4) A 30-mm wide and 40-mm high (30mm×40mm) photograph: It must show the applicant's upper body and face, and have been taken within 3 months of the date of application; applicants should be facing the camera with no hat/cap; to be affixed on the Personal Identification Card
- (5) An application processing fee of 30,000 yen will have to be paid through the Post Office or Postal Bank (Note: it cannot be paid through any other banks or financial institutions, and an ATM may also not be used for transferring the amount), and the payment slip (with the date of payment) must be pasted on 'Application Processing Fee Payment Certificate' provided with the application forms. Please note that except for the condition stated on page 8 under '9 (3) Return of Application Processing Fee', the application processing fee will not be returned.
- (6) Admission Card return-mailing envelop (If you wish your Admission Card to be mailed to your address, please paste a **362-yen** postal stamp and self-address the envelope provided with the application material.)
- (7) A copy of Residence Card (If an applicant is in Japan at the time of application, such a certificate is issued by the city or town of residence.)
- (8) Earth's Evolution and Environmental course, Biology and Environmental Science course

Please submit the original transcript of TOEIC or TOEFL iBT and a copy (A4 size) of it. We will take it as your English score after conversion. Please prepare an Official Score Certificate of TOEIC or Official Score Report of TOEFL iBT that was issued in or after **April 2014**. You cannot use the transcript of Institutional Program, for example TOEIC IP.

#### 6. Marks Distribution, Marking, Evaluation Criteria, and Selection Criteria

(1) Marks Distribution:

<school engineering="" of=""></school>		
Course	Interview (including Oral Test)	Total
Mechanical Engineering		
Civil and Environmental Engineering		
Materials Science and Engineering	100	100
Applied Chemistry	100	100
Electrical and Electronic Engineering		
Computer Science		

\* The submitted grade sheet/s or transcript/s will be evaluated in A, B, or C level, and will be considered in final selection.

<School of Science>

Course	Specialized	English	Interview (including	Total
	Subjects		Oral Test)	
• Physics				
Earth's Evolution and				
Environment	200	100	100	400
Biology and Environmental				
Science				

X As Earth's Evolution and Environment course, scores on the TOEIC or TOEFL iBT are used after conversion. The following is the two ways of conversion. Your English score is 100 if the score is more than 100 after conversion by these ways.

[English score after conversion] =  $0.2 \times [\text{scores on the TOEIC}] - 30$ [English score after conversion] =  $100 \times [\text{scores on the TOEFL iBT}] / 120 + 20$ 

X As Biology and Environmental Science course, scores on the TOEIC or TOEFL iBT are used after conversion. The following is the two ways of conversion. Your English score is 100 if the score is more than 100 after conversion by these ways.

[English score after conversion] = [scores on the TOEIC] /7[English score after conversion] =  $100 \times [scores on the TOEFL iBT] / 120 + 20$ 

Course	Interview (including Oral Test)	Total
Mathematical Sciences	100	100
Molecular Science	100	100

X The submitted grade sheet/s or transcript/s will be evaluated at A, B, or C levels, and will be considered in final selection.

(2) Marking and Evaluation Criteria:

Course Basis for Marking, Evaluation Criteria
---

		evaluation	(General Criteria)
neering	<ul> <li>Mechanical Engineering</li> <li>Civil and Environmental Engineering</li> <li>Materials Science and</li> </ul>	Grade sheet/s or transcript/s	Only the performance in specialized subjects will be considered.
School of Engineering	<ul> <li>Materials Science and Engineering</li> <li>Applied Chemistry</li> <li>Electrical and Electronic Engineering</li> <li>Computer Science</li> </ul>	Interview (including Oral Test)	Fundamental understanding, aims and objectives, study motivation, self appeal and presentation, etc. will be considered.
School of Science	<ul> <li>Physics</li> <li>Earth's Evolution and Environment</li> <li>Biology and Environmental Science</li> </ul>	Specialized subjects English Interview (including Oral Test)	Understanding of specialized subjects will be considered. General English ability will be considered. Aims and objectives, study motivation, self appeal and presentation, etc. will be considered in the interview, while fundamental understanding will be examined through the oral test.
Sch	<ul> <li>Mathematical Sciences</li> <li>Molecular Science</li> </ul>	Grade sheet/s or transcript/s Interview (including Oral Test)	Only the performance in specialized subjects will be considered. Fundamental understanding, aims and objectives, study motivation, self appeal and presentation, etc. will be considered.

# (3) Selection Criteria:

	Course	Decision criteria	Method of ordering
			applicants who are

Separate Table for Extent of Questions (School of Science) in Specialized subjects for the written examination

Course Name	Subjects for examination	Remarks
Physics	Mechanics	
	Electromagnetism	
	Statistical and Thermal Physics	
	Quantum Mechanics	
Earth's Evolution and	• Petrology	A total of seven questions will
Environment	Mineralogy	be asked in the examination:
	• Geology	two from petrology and
	Paleontology	mineralogy, two from geology,
	Quaternary research	paleontology, Quaternary
	Environmental geology	research and environmental
	Geophysical exploration	geology, two from geophysical
	• Seismology	exploration, seismology,
	Physical properties of earth	physical properties of earth
	interior	interior and physical
	Physical oceanography	oceanography, and one from
	Biology	biology. Any 4 questions will
		have to be answered.
Biology and	• Biology (Molecular Biology, Cell	Three questions from a total of
<b>Environmental Science</b>	Biology, Morphology,	eight given questions (six from
	Physiology, Developmental	Biology and two from Related
	Biology, Genetics, Ecology,	Sciences) will have to be
	Environmental Biology) and	selected and answered. The 4th
	Related Sciences, such as	question will be essay-type,
	Biochemistry and Earth Science	focusing on your proposed
		research plan, which will have
		to cover at least the following
		items: 1) research background,
		2) method to approach the
		problem or methodology, and 3)
		expected outcome

#### 7. Admission Formalities

(1) Admission Date and Entrance Ceremony: The admission to the Graduate School begins from the date of entrance ceremony, which will take place on **22** (**Fri**) **September 2017**. However, those whose application eligibility is valid only after 24 (Sun) until 30 (Sat) September 2017, according to the academic rules of this university, the admission date will be 1 (Sun) October 2017.

- (2) The following are necessary at the time of admission.
  - 1) Admission Fee of **282,000 yen**
  - 2) Graduate school-specified admission forms/papers
- (3) Admission Formality Period: The admission formalities will take place on **4** (Mon) to **8** (Fri) **September 2017** from 9:00AM to 5:00PM.

#### 8. Admission Fee, Tuition Fee, and Miscellaneous Charges for the First Year

- (1) Admission Fee and Tuition Fee: Admission Fee: 282,000 yen (to be paid at the time of admission formality) Tuition Fee: First Semester 267,900 yen; Second Semester 267,900 yen (Annual amount: 535,800 yen)
- (2) Miscellaneous Charges: A few thousand yen will have to be paid for miscellaneous purposes.
- **Notes**: 1. The Tuition Fee has to be paid after admission, so successful applicants will be notified of the payment period at a later date.
  - 2. If a current student's tuition is revised, a new recalculated fee will be applicable.
  - 3 . A system to waive the Admission Fee as well as Tuition Fee is available, but it is only available to those who have excellent academic records and face economic hardship to pay these amounts or come across some special conditions such as a severe impact of natural disasters. Depending on the extent of economic hardship or impact of disasters, partial or full waiver of the above fees through necessary selection procedure is possible. Additionally, a system of late payment of the above fees is available.

#### 9. Miscellaneous

- (1) The 'Application Guidelines' (including the Application Forms) can be obtained through postal service. Please send a self addressed and stamped (380 yen, within Japan) envelope (33 cm x 24 cm) to the Graduate School Office (given on page 1). You must indicate on the envelope by red-inked pen that 'Request for Application Material for September 2017 Entrance.'
- (2) After receiving the application documents, no changes will be allowed in the application information or submitted documents. The submitted documents and application forms cannot be returned under any conditions.
- (3) Return of Application Processing Fee: It can be returned only if one of the following is true.
  - ① Application Processing Fee was paid but the application documents were not sent/submitted
  - ② Mistakenly paid the Application Processing Fee two or more times, or paid an amount greater than the required amount of 30,000 yen
  - ③ Sent/submitted the application documents, but the application was rejected

#### (Requesting for the return of the Application Processing Fee)

In case of **condition (Dor (2)** above, please contact us at the address below. We will send you a 'Request for Return of the Application Processing Fee' form, which you will have to fill

out and send back to us by post. In case of **condition** ③, however, we will send you the 'Request for Return of the Application Processing Fee' form along with your application documents, which you will have to fill out and send back to us by post.

Communication Address: The External Payment Affairs Team Financial Planning Division Finance Department, Ehime University 10-13 Dogo-Himata, Matsuyama 790-8577, Ehime, JAPAN Tel: +81-(0)89-927 9074

- (4) If the information in the application forms or application documents is found to be wrong, the permission to enter the Graduate School will be cancelled and the admission will be denied even after the certificate of permission to enter has been already issued.
- (5) Privacy Policy (Use of personal information): Any personal information provided in application forms such as names and addresses is solely for processing applications, contacting applicants if an application document is incomplete, conducting entrance examination, notifying successful applicants, and sending admission procedure documents. It is also used for academic affairs after enrollment (student registration, educational guidance), student support services (health-care management, scholarship applications), tuition administration, and to conduct surveys and research (improve entrance examinations, study and analyze application trends). The personal information will not be used for any other purpose and will not be provided to third parties.

Course	Field	Research outline	Staffs and Research Fields
		This educational and research field	Toshiro Tanaka
srin	ysic	consists of 5 subjects : The"Quantum	Research on the magnetic and transport properties of
inee	Phy	Materials Group" studies	Ceramics, and development of the new advanced
igu	cal	semiconductors, magnetic materials	ceramics.
Id E	emi	and ceramics, nano materials;	Masaharu Fujii
e ar	Che	the"Solid State Physics Group"	Developement of new organic semiconductor device,
ence	ied	studies condensed matter physics	application on biomaterials, and analysis of dielectric
Scie	Applied Chemical Physics	with an atomic scale ; the "Materials	phenomena and electrical breakdown.
als	A	Control Engineering Group" studies	Hiromichi Takebe
teri		the fine structures closely related to	Research on processing, properties and structure of
Materials Science and Engineering		material properties and its control	new photonic glasses and ceramics.
		through an atomic scale ;	Koichi Hiraoka
		the"Electrical and Electronic	Solid state physics of magnetic materials (such as
		Materials Group" studies electrical	transition-metal compounds and rare-earth
		and electronic properties of dielectric	compounds) and strongly correlated electron systems.
		materials and conductive polymers ;	Sengo Kobayashi
		the "Materials Processing	Researches on phase transformation in various
		Engineering" studies the processing,	materials such as biomaterials and structural materials
		the properties and the structure of	and on microstructures at/ around interface in
		glasses and ceramics for new	composite materials.
		functionality.	Saeki Yamamuro
			Size-and shape-controlled synthesis of nanoparticles and their functionalities.
			Haruo Ihori
			Research of electrooptical measurement of electric
			field vector distributions in dielectric liquids, and reuse
			of used papers by laser.
			Akira Saitoh
			Present research areas covering characterization and
			structure of transparent amorphous materials.
			Hideaki Sasaki
			Research on production technology and recycling of
			metallic materials, including base metals (such as iron
			and copper) and rare metals.
			Tatsuaki Sakamoto
			Researches on strengthening and toughening of
			structural materials at room and elevated temperatures
			by microstructural control through phase
			transformation
			Hyeon-Gu Jeon
			Fabrication of nanoparticle colloids of organic
			semiconductors by laser ablation method and
			application to organic electronics.

ng	The "Structural Materials Engineering	≫Masahiro Ohara
eri	Group" studies mechanical properties	Studies on welding and joining processes for advanced
gine	of engineering materials and their	materials
Eng	fracture behaviors from the point of	Hiromichi Aono
[ pu	view of fracture mechanics and	Studies of materials such as nano-sized particles,
nt a	fractography. The"Environment and	poly-metallic oxides, porous materials for application
mer	Energy Materials Group" studies the	of medical care, fuel cell, chemical sensor, catalyst,
Idol	preparation of new functional nano	and decontamination
Materials Development and Engineering	particulates, composite materials,	Yoshiteru Itagaki
Ď	porous materials, etc. used for	Development of solid oxide catalysts and their
ials	medical treatments, fuel cells,	application for chemical sensors and solid oxide fuel
ateı	chemical sensors, catalysts,	cells
W	radioactive Cs decontamination, etc.	Takashi Mizuguchi
	The "Medical and Biomaterials	Development of thermo-mechanical and alloying
	Engineering Group" studies the	techniques for improvement of mechanical properties
	development of biocompatible	of structural metal materials
	ceramics and magnetic materials.	
	The"Materials Joining Engineering	
	Group" studies welding and joining	
	processes for advanced materials.

Major	Field	Research outline	Staffs and Research Fields														
		The main research subjects of this	X Akihiko Yamamoto														
Earth Scienc	division are to elucidate the history and the law of changes and evolution of the Earth, and to analyze the dynamic properties of the Earth. Our	(a)Active fault tectonics and crustal (geological) structures based on geophysical (particularly gravity) data, (b) Gravity inversion to estimate surficial terrain density distribution, (c)Tsunami simulation for great earthquakes.															
	ion	the Earth, evolution of vertebrate	Tetsuo Irifune														
	Evolution	animals, crustal movements, the petrologic and rectonic structures of	Development of high-pressure technology and its application to the internal structure of the Earth.														
	s E	the island arc mobile belt, the crust-	Taku Tsuchiya														
	Earth' :	mantle interactions, the environmental changes of the Earth, and the physical	Theoretical and computational study of minerals and modeling the Earth and planetary interiors.														
	Ea	and dynamic properties of the deepearth materials.	Masanori Kameyama														
			Mantle Dynamics ; Studies on flows, deformations, and evolutions of the Earth's interior based on the computational fluid dynamics.														
			Hiroaki Ohfuji														
			Experimental study on the phase transition, crystallization, selforganization of minerals.														
			Jun Tsuchiya														
			Computational study of the existence and its effects of volatile elements in the Earth's interior.														
			Yu Nishihara														
			Experimental study on transport properties (such as rheology) of deep Earth materials.														
			Takeshi Sakai														
			Study of equations of state of terrestrial planet materials using laser heated diamond anvil cell														
			Tomohiro Ohuchi														
			Rheological properties of rocks under high pressures (e.g., creep and fracture strength, seismological properties) and processes of microstructure formation														
			Haruhiko Dekura														
			Theoretical condensed-matter and computational physics on electronic-structural, dynamical, and transport properties of deep Earth and planetary materials														
																	Masayuki Nishi
			Mechanism and kinetics of high-pressure transitions in mantle minerals.														
			Masayuki Sakakibara														
			Based on the viewpoint of interactions and feedbacks among biosphere, hydrosphere, atmosphere, and lithosphere, (a) interaction between microbial														
			activity in the crust, (b) igneous petrology of tephra, and (c) technological development of phytoremediation.														
			Hiroshi Mori Origin of achondritic meteorites, shock effects in ordinary chondrites.														

***************************************
Satoshi Saito
Petrology and geochemistry. Granite petrogenesis. Evolution of arc and continental crust in convergent margin.
Takashi Okamoto
Evolution and paleoecology of fossil mollusks, especially in the theoretical modeling of ammonoid shell morphology and morphogenesis during the Cretaceous period.
Rie S. Hori
Geological and paleontological studies on deep-sea sediments and paleoenvironment.
Takehisa Tsubamoto
Evolution, paleobiogeography, and paleoecology of land mammals during the Cenozoic. Excavation, description, and paleontological study of vertebrate fossils.
Nao Kusuhashi
Vertebrate paleontology focusing on the evolution and early history of mammals during the Mesozoic.
Xinyu Guo
Shimulation of the Kuroshio, Interaction of the Kuroshio and coastal water, Marine environmental prediction of Seto Inland Sea
Akihiko Morimoto
Studies on variability in ocean currents using remote sensing and hydrographic observation, and material cycle in coastal seas.
Michinobu Kuwae
Long-term variability of ocean-atmosphere-ecosystem : regime shift and fisheries productivity dynamics. Late Holocene climate dynamics on centennial timescales in the North Pacific. Impacts of transboundary pollution and global warming on marine and lake ecosystems.
Naoki Yoshie
Studies on marine lower-trophic level ecosystem and biogeochemical cycle using field observation and ecosystem modeling
Abrazhevich Aleksandra
Paleomagnetism and rock magnetism applied to tectonic and paleoenvironmental problems. Rock magnetic record of climatic events. Biogenic magnetic minerals and their contribution to natural remanent magnetization of sedimentary rocks. Diagenetic modification of magnetic mineral assemblage.
