2. Application Eligibility

An applicant to this program must be a non-Japanese national residing overseas; who is eligible for the permission to stay in Japan as a student under the state regulations of immigration and refugee control, and at the same time, is a graduate of or should be expecting to graduate from a college or university that has an official academic exchange agreement with Ehime University or has collaborative research program/s with the faculty member/s of this Graduate School; and must meet one of the following requirements.

- (1) An applicant must have received, or be expected to receive at the time of the admission in September 2018, a Master's degree (or equivalent) outside Japan.
- (2) An applicant must be recognized by the Graduate School of Science and Engineering of Ehime University through an individual eligibility screening as having academic ability equivalent or superior to that of those who have completed a Master's program, and must be at least 24 years of age at the time of admission.

⟨Pre-application Eligibility Assessment for Requirement(2) above⟩

1) Application Eligibility

An applicant to this program must be 24 years or older at the time of admission, and must have a research record or achievement as assessed by an Evaluation Committee in terms of published book/s, research papers (international/domestic journal/s or equivalent publication/s), a record of academic presentations and lectures, research reports, patent/s, etc. with greater weight than master's degree research.

- 2) Documents to be Submitted for Pre-application Eligibility Assessment
 - A) Pre-application Eligibility Assessment Form (specified format)
 - B) Research Activity Record/Achievement Form (specified format)
 - C) Bachelor's or Master's Degree Certificate obtained from the last-attended college or university
 - D) Other reference materials (such as Research Paper/s, Patent Certificate/s, etc.)
- 3) Submission Deadline: **10 October 2017** (Tue)

To be submitted only after adequate discussion prior to application regarding intention to apply for the program and related issues with the Program Chief of applicant's field of interest.

(Must be received through **EMS** by this deadline)

4) To be Submitted/Sent to:

Education Support Division (Engineering Team)

Ehime University

3, Bunkyo-cho, Matsuyama, 790-8577

JAPAN

5) Admission Eligibility Assessment

Based on the submitted application documents, an assessment of admission eligibility will be made, and the applicant/s will be notified of result/s by 3 November 2017 (Fri). Please note any submitted documents for this purpose will not be returned or used outside of eligibility status, so if you are notified that you are eligible for application, you will need to re-submit any repeated papers/documents (listed in point No. 5 of this guidelines) while submitting your application for admission. Moreover, the application eligibility assessment result will only be valid for application to the 2018 Application Guidelines for Special Selection for Doctoral Program for International Students

3. Application Period and Selection Test

Application period 10 (Fri) –17 (Fri) November 2017

Must be received through **EMS** within this period.

Submission of Education Support Division (Engineering Team)

application Ehime University

documents 3, Bunkyo-cho, Matsuyama, 790-8577

JAPAN

(Further inquiry/ies in relation with the application procedure and document submission may be made at kougakum@stu.ehime-u.ac.jp.

Please send emails in English or Japanese only.)

Selection test date Will be conducted by 13 December 2017 (Wed)

Result notification **26 December 2017** (Tue)

(A 'Letter of Notification' will be sent to successful candidates. Telephone

or Email inquiries are not permitted.)

Potential applicants to this program are supposed/required to communicate with the Program Chief in their field of interest and express their interest in applying by 2 **November 2017** (Thu). The email addresses for this purpose are:

Program Chief Engineering for Production and Environment	hinata.hirofumi.dv@ehime-u.ac.jp	
Program Chief Materials Science and Biotechnology	takai.kazuyuki.mz@ehime-u.ac.jp	
Program Chief Electrical and Electronic Engineering and Computer Science	okamoto.yoshihiro.mj@ehime-u.ac.jp	
Program Chief Mathematics, Physics, and Earth Sciences	so.hiroto.mf@ehime-u.ac.jp	
Program Chief Chemistry and Biology	zako.tamotsu.us@ehime-u.ac.jp	

4. Selection Criteria

1) Method

Selection for admission to this program will be made on the basis of integrated evaluation of submitted documents and performance in the interview (internet-based interview).

2) Interview question content (including the oral test)

The interview questions will be based on the master's degree thesis research, research activities and achievements, doctoral research plan, etc.

5. Application Material and Documents to be Included

A. Completed application form including the Entrance Test Admission Card and Personal Identification Card with a photograph (*provided with the application material; Form#1*) (The photograph should be 30-mm wide and 40-mm high (30mmx40mm) showing the torso and face of the applicant. The applicant should be facing forward and not wearing a cap/hat. The photo should have been taken no more than 3 months prior to the date of application).

- B. Officially sealed copies of Grade Sheets or Transcripts of Bachelor's Degree course issued by the graduating university or college
- C. Bachelor's Degree Certificate issued by the graduating university or college
- D. Officially sealed copies of Grade Sheets or Transcripts of Master's Degree issued by the graduating university or college
- E. A copy of Master's Degree Certificate or Certificate of expected date of graduation issued by the graduating university or college
- F. Officially sealed Letter of Recommendation from the Dean/Principal/Campus Chief or a high-ranking official of the graduated/graduating university or college (*provided with the application material;* Form#2)
- G. A written pledge indicating the possibility of arriving in Japan on or before **23 September 2018** (Sun) if selected (*provided with the application material; Form#3*)
- H. Research Plan or Proposal on the specified paper (provided with the application material; Form#4)
 - (Regarding the research topic or field, research concept, objectives and methodology, an applicant must discuss in advance with their expected research supervisor)
- I. Summaries of Master's thesis (outline) and published research papers and related achievements
 - The summary of the Master's thesis or any equivalent research material should be about 2,000 letters in Japanese or about 500 words in English. Additionally, if you have similar research content in printed/published form, have a technical report, and possess any patents or innovative plans, please include a brief summary of each with the application material. Also, as far as possible, please include a copy of each published research paper.
- J. A copy of applicant's passport details (front page personal details); if unavailable at the time of application, it must be submitted at the time of entrance examination
- K. Application Processing Fee

The application processing fee is 30,000 yen. If paying by remittance from an overseas bank or financial institution, you must confirm that the amount to be transferred (remitted) to us is 30,000 yen exactly; an equivalent amount in another currency will not be accepted. You may ask the bank or financial institution to make the payment in Japanese currency so that they do not deduct their handling charges and the service charges at paying bank in Japan from the amount of application processing fee at the time of making the bank transfer (remittance). Please include the bank transfer slip (payment application form) with the application material.

1) Amount to be remitted: 30,000 yen (exact amount payable only in yen)

(The remitter (applicant) is responsible for the remittance charge. A fee of 1,500 yen charged by the financial institution listed below is to be paid at the time of remittance. The remittance processing fee charged by the financial institution below will not be deducted twice (i.e.

1,500 yen is only deducted once))

2) Bank account details for transferring the application processing fee

Bank Name: THE IYO BANK LTD.

Bank Code: 0174 Swift Code: IYOBJPJT

Branch Name: ICHIMAN BRANCH

Branch Code: 109

Branch Address: 2-20-1 KATSUYAMA-CHO, MATSUYAMA 790-0878,

EHIME, JAPAN

Account Number: 1799161

Account Holder's Name: NATIONAL UNIVERSITY CORPORATION EHIME

UNIVERSITY

10-13 DOGO-HIMATA, MATSUYAMA 790-8577,

EHIME, JAPAN

3) Period of payment: From **30** (Mon) **October** to **6** (Mon) **November 2017**,

17:00 (Japan Standard Time, strictly within this period)

4) Remittance method: TELEGRAPHIC REMITTANCE5) Paying bank charges: To be paid by the sender (applicant)

6) Additional information: When sending a remittance, write university entrance

examination fee as the purpose of the remittance, and your full name as well as the name of the graduate course

under message.

Note: If the application processing fee is insufficient (i.e. less than 30,000 yen), your application documents will be regarded as incomplete and your applicant material will be rejected. In such a case, the remitted application processing fee will be returned, but any charges payable to the bank in Japan as well as the applicant's side will have to be borne by the applicant himself/herself. However, the application processing fee will not be returned in any other cases except for the conditions listed under **Point#6** of this Application Guideline.

6. Return of the Application Processing Fee

The paid or remitted amount of Application Processing Fee will be returned in the following case/s only (Note: any charges payable to the bank in our side as well as the applicant's side will have to be borne by the applicant himself/herself.).

- 1) The Application Processing Fee was paid, but application papers were not sent/submitted
- 2) Mistakenly paid the Application Processing Fee two or more times, or paid an amount greater than the required amount of 30,000 yen
- 3) Sent/submitted the application documents, but the application was rejected

(Requesting for the return of the Application Processing Fee)

In cases of **condition 1**) **or 2**) above, please contact us at the address below. We will send you a 'Request for Return of the Application Processing Fee' form, which you must fill out and send back to us by post. In case of **condition 3**), however, we will send you the 'Request for Return of the Application Processing Fee' form along with your application documents, which you must fill out and send back to us by post.

Communication Address:

The External Payment Affairs Team

Financial Planning Division

Finance Department, Ehime University

10-13 Dogo-Himata, Matsuyama 790-8577, Ehime, JAPAN

E-mail: suitou@stu.ehime-u.ac.jp

7. Application Method

The application forms and necessary information may be downloaded from the Ehime University website (https://www.ehime-u.ac.jp/target_english/). To apply for this program, all applicants must send completed application forms and necessary documents to us by post/mail.

8. Admission Formalities and Period

- (1) The following are necessary at the time of admission.
 - 1) Admission Fee of **282,000 yen**
 - 2) Graduate school-specified admission forms/papers
 - 3) **8,000 yen to 10,000 yen** as miscellaneous charges/fees

(2) Admission Period

Admission will take place on **24 September 2018** (Mon). The details will be sent to successful candidates at a later date.

(3) Tuition Fee

A tuition fee of **267,900 yen** for the first semester and an equal amount for the second semester (Annual tuition fee: **535,800 yen**) must be paid after the admission/enrollment. The admission fee and tuition fee may be revised (in most cases increased) at the time of admission or even after/during enrollment, which will be applicable from the date of revision.

Successful candidates will be separately notified of the period for tuition fee payment.

9. Privacy Policy (Use of personal information)

Any personal information provided in application forms such as names and addresses is solely for processing applications, contacting applicants if an application document is incomplete, conducting entrance examination, notifying successful applicants, and sending admission procedure documents. If an application document is incomplete, Ehime University may notify the applicants' institution to request the document be promptly amended and resubmitted. It is also used for academic affairs after enrollment (student registration, educational guidance), student support services (health-care management, scholarship applications), tuition administration, and to conduct surveys and research (improve entrance examinations, study and analyze application trends). The personal information will not be used for any other purpose and will not be provided to third parties.

10. Important Note

The submitted application documents must be complete, accurate, and authentic. Incomplete, inaccurate, or unauthentic application documents may result in denial of admission.

Communication Systems Engineering

The research activities cover the signal processing for high-density digital magnetic and optical recording systems, investigation of fundamental properties of subwavelength optical elements including holograms, media processing algorithms related to motion, neural networks applications to signal and image processing, sequence design and signal processing for baseband spread-spectrum communications, fractional topological invariants and topological self-similarity.

Shinji Tsuzuki

- (1) Research on sequence design and signal processing for baseband spread-spectrum communications, and its application to power-line communication
- (2) Analysis of CDMA based protocols
- (3) Developing high-definition video transmission systems over IP network

Yoshihiro Okamoto

Research on channel coding and signal processing techniques to achieve high density recording in digital information storage systems

Yasuaki Nakamura

Research on error correction coding and iterative decoding systems for information storage

Hiroyuki Ichikawa

Investigation of foundamental properties of subwavelength optical elements including holography and their application and electromagnetic analysis of light wave propagation.

Applied Computer Science	 2. 3. 	theory and algorithms of computations in science and engineering: partial differential equations, their numerical solutions and numerical conformal mappings. Scientific computer simulations for natural sciences: parallel computing, high-performance computing, grid computing, performance estimation model and performance evaluation.

4. Cognitive science: pattern cognition,

information, contents production,

coding, processing and service

human information processing.

5. Applications of multimedia

systems.

Hiroshi Ito
Mathematical Physics : Mathematical scattering
theory, Inverse scattering problem
Minoru Kawahara

Informatics: information networks, information and communication system, data mining, information and communication supports.

Kazuto Noguchi

Optical communication systems and applications : optical devices, optical transmission systems, telemedicine.

Hirohisa Aman Empirical software engineering: software quality quantification using software metrics, and statistical

quantification using software metrics, and statistical model for quality assessment/prediction.

Kazunori Ando

Mathematical Physics: Scattering theory and inverse scattering problems for discrete Schrödinger operators on graphs

Dai Okano

Numerical Analysis: Numerical method for partial differential equations, optimizations, the method of fundamental solutions.

Hisayasu Kuroda

High performance Computing: Development of high performance numerical library, large-scale numerical simulation on multiprocessors.

Course	Field	Research outline	Staffs and Research Fields
Physics	Physics	Theoretical and experimental researches on fundamental problems in physics are performed. The following branches are covered in the activities: foundations of quantum theory, quantum field theory, gauge theories, investigations of the structure and the evolution of the universe theoretically and by the observation of X-rays, visible radiation.	Hiroto So Challenge for particle physics, by field theory, lattice gauge theory, higher-dimensional theory, supersymmetry and high power computers.
	nda		Hisamitsu Awaki Study of structure and evolution of the Universe. In particular, study of active Universe through cosmic X- ray emission, and development of instruments for X-ray observatory.
			Yuichi Terashima Study of high energy phenomena in the Universe. In particular, observational study of black holes and the structure and evolution of the Universe.
			Observational studies on the formation and evolution of galaxies and supermassive black holes. Studies on the chemical evolution of the Universe.
			Masaru Kajisawa Observational studies of galaxy formation and evolution. History of star formation and mass assembly of galaxies.
			Yoshiki Matsuoka Observational research on the evolution of galaxies, supermassive black holes, and the Universe.
	sma Ph	Various phenomena concerning condensed matters are studied theoretically and experimentally. Special interests are taken in (1) dynamical theory of phase transition and pattern formation in nonequilibrium open systems, (2) theoretical study of self-assemblies in solution, (3) theoretical study of strongly correlated electron systems, (4) experimental studies of magnetic, thermoelectric and optical materials, and (5) plasma physics in liquid.	
			Kazuhiro Fuchizaki Theoretical treatment on chemical physics of phase equilibria and relaxation kinetics.
	a M		Tsunehiro Maehara Experimental study of plasma in liquid ———————————————————————————————————
	Conden		Experimental study of solid state physics. In particular, studies on magnetism originated from microscopicstructure of the materials.
			Tohru Shimizu Space plasma physics, fast magnetic reconnection based on MHD and kinetic theory and numerical studies.
			Masaaki Nakamura Theoretical study for strongly correlated quantum systems and topological materials, such as Tomonaga- Luttinger liquid, low-dimensional magnet, quantum Hall effect, graphene, and topological insulator.

*Scheduled to retire in March, 2019

The main research subjects of this division are to elucidate the history and the law of changes and evolution of the Earth, and to analyze the dynamic properties of the Earth. Our current interests concern the structural and evolutional process of the Earth, evolution of vertebrate animals, crustal movements, the petrologic and rectonic structures of the Earth, and the physical and dynamic properties of the Earth, and the physical and dynamic properties of the Earth, and the physical and dynamic properties of the Earth, and the physical and dynamic properties of the deepearth materials. The main research subjects of this division and the law of changes and evolution of the Earth and planetary interiors. Massanori Ka Mantle Dynamics: Studies on flows, deformations, evolutions of the Earth in interior based on the computational fluid dynamics. Experimental study on the phase transition, crystallization, self-organization of minerals. Computational study of the existence and its effort volatile elements in the Earth's interior. Yu Nis Experimental study on transport properties (such rheology) of deep Earth materials. Masayuki Saka Based on the viewpoint of interactions and feedbe among biosphere, hydrosphere, and lithosphere, (a) interaction between nicrobial activity in the crust, (b) igneous petrology of tephra, and (c) technological development of phytoremediation. Takehisa Tsu Evolution, paleohiogeography, and paleococology of mammals during the Cenozoic. Excavation, descript and paleontological study of vertebrate fossils. Shimulation of the Kuroshio, Interaction of the Kuroshio and coastal water, Marine environmental rrediction of Seto Inland Sea Michinobu Long-term variability of ocean-atmosphere-eccoyst regime shift and fisheries productivity dynamics.
