3. Application Eligibility

An applicant to this program must be a non-Japanese national who is eligible for permission to stay in Japan as a student under the state regulations of immigration and refugee control; at the same time, must have or is expected to have eligibility for admission into the graduate school; and must meet one of the following requirements.

- (1) Must have acquired or is expected to acquire by **March 2018** a Master Degree or Professional Degree (in accordance with the type of degree mentioned in Article 5 (2) of the Academic Degree Regulations, as stated in Article 9 of the 1953 Ordinance of the Ministry of Education, based on Article 104, page 1 of the Academic Act; hereinafter Professional Degree refers to this description).
- (2) As for a degree from an overseas college or university, it must be equivalent to a Master Degree or Professional Degree in Japan, and at the time of application, it must have been acquired or is expected to be acquired by **March 2018**.
- (3) As for a degree acquired from distant learning education system run by an overseas college or university, an applicant must have acquired or is expected to acquire a degree equivalent to Master Degree or Professional Degree through earning of the subject credits in Japan itself by March 2018. Any credits earned overseas will not be accepted.
- (4) As for a graduate program run by an overseas university or college in Japan, recognized as being equivalent to an academic institution that meets all requirements of the education system of that nation

- and designated separately by the Minister for Education, Culture, Science and Technology, an applicant must have acquired or should be expecting to acquire a degree equivalent to a Master program degree or a Professional degree by **March 2018**.
- (5) Must have acquired or is expected to acquire a Master Degree or equivalent from the United Nations University by **March 2018**.
- (6) Must be accepted as to have an academic ability equivalent to or greater than a master degree holder, after having attended an overseas university/college or an academic institution as in (4) above or the United Nations University and earned necessary credits, and having passed the exam and evaluation in accordance with Article 16(2) of the Graduate School Setup Criteria.
- (7) A person designated by the Minister for Education, Culture, Science and Technology (According to the Article 118 of Bulletin of Ministry of Education, Culture, Science and Technology published in 1988)
- (8) As for the graduates of one of the Graduate Schools of this university, an applicant must go through a separate evaluation for admission eligibility and must have academic abilities equivalent to or greater than those of a Master Degree or Professional Degree holder, and must be 24 years old by **March 2018**.

⟨Pre-application Eligibility Assessment for Requirement#7 and #8 above⟩

1) Application Eligibility

<For an applicant meeting Requirement#7>

Applicants possessing only a bachelor's degree (undergraduate program) must have research experience, after acquiring the degree, for 2 (two) years or more at a university/college or research institute, and must have an enough number of publications, such as book/s, scientific journal paper/s, lecture/s, research report/s, patent registration/s, etc. that may be recognized as being equivalent to a master degree research or above.

<For an applicant meeting Requirement#8>

The applicant must have a good research record or achievement in the form of published book/s, scientific journal paper/s, lecture/s, research reports, patent registration/s, etc. that may be recognized as being equivalent to a master degree research or above, and must be 24 years old by **March 2018**.

- 2) Documents to be Submitted for Pre-application Eligibility Assessment
 - A) Pre-application Eligibility Assessment Form (specified format, **Form#7**)
 - B) Research Activity Record/Achievement Form (specified format, Form#6)
 - C) Bachelor or Master Degree Certificate obtained from the last-attended college or university
 - D) Other relevant reference materials (such as Research Paper/s, Patent Certificate/s, etc.)
 - E) Self-addressed envelope with an 82-yen postal stamp (for notifying the result of application eligibility assessment)
- 3) Submission Deadline: 15 December 2017 (Fri)
- 4) To be Submitted/Sent to:

Education Support Division (Engineering Team)

Ehime University

3, Bunkyo-cho, Matsuyama, 790-8577

JAPAN

(**Note**: On the envelope, please write 'Pre-application Eligibility Assessment Papers for Doctoral Program enclosed' with a red pen.)

5) Admission Eligibility Assessment

Based on the submitted application documents, an assessment of admission eligibility will be made, and the applicant/s will be notified of the result by 15 January 2018 (Mon). Please note any submitted

documents for this purpose will not be returned or used outside of eligibility status, so if you are notified that you are eligible for application, you will need to re-submit any repeated papers/documents (listed in point No. 5 of this guidelines) while submitting your application for admission. Moreover, the application eligibility assessment result will only be valid for application to the **2018** doctoral program of this graduate school.

4. Selection Criteria

(1) Selection method

The selection for admission to this program will be made on the basis of an integrated evaluation of 1) submitted documents and 2) performance in an interview (including oral test).

(2) Interview question content (including the oral test) The interview questions will be based on the applicant's master thesis research, research activities and achievements, doctoral research plan, etc.

5. Application Material and Documents to be Submitted

Personal Identification Card, and Admission Card (The photograph should be 30-mm wide and 40-mm high (30mmx40mm); it must be full-face view directly facing the camera with no cap/hat, taken within the 3 months from the date of application.) Degree certificate or Certificate or Certificate or Sexpected graduation Certificate of expected graduation Expected graduation A copy of Master Degree Certificate or Certificate of expected date of graduation issued by the graduating university or college [For applicants meeting application eligibility requirement No. (1) to (6)] Applicants meeting application eligibility requirement No. (6) will have to include all necessary documents that help assess his or her ability to undertake doctoral research. Grade sheets or Officially sealed copies of Grade Sheets or Transcripts of Bachelor Degree course issued by the graduating university or college (Bachelor Course) Grade sheets or Officially sealed copies of Grade Sheets or Transcripts of Master Degree course issued by the graduating university or college [For applicants meeting application eligibility requirement No. (1) to (6)] Summary or outline of master thesis A summary of the Master Thesis should be prepared on Form#2 with about 2,000 letters in Japanese or about 500 words in English. Additionally, if you have similar research content in printed/published form, have a record of academic presentations and lectures, or possess any patent registration certificates, please include a copy of each of them. Outline of Master Course research An outline of ongoing Master Degree research should be prepared on Form#3 with about 2,000 letters in Japanese or about 500 words in English.		
the application material; Form#1) with a photograph (The photograph should be 30-mm wide and 40-mm high (30mmx40mm); it must be full-face view directly facing the camera with no cap/hat, taken within the 3 months from the date of application.) Degree certificate or Certificate of expected graduation A copy of Master Degree Certificate or Certificate of expected date of graduation issued by the graduating university or college [For applicants meeting application eligibility requirement No. (1) to (6)] Applicants meeting application eligibility requirement No. (6) will have to include all necessary documents that help assess his or her ability to undertake doctoral research. Application	The application processing fee is 30,000 yen. It must be paid through postal bank or
processing fee	post office in Japan. Payment through other financial institutions or banks will not
	be accepted. ATM payment is also not accepted. After the payment of this fee, you
	will have to attach (paste) the stamped payment slip (certificate) with the provided
	paper (i.e., application processing fee payment certificate) and submit along with the
	application documents.
	The application processing fee, except for the conditions stated in point No. 7 of this
	guideline (i.e., Return of the application processing fee), will not be returned.
	[Note: Application processing fee is not required for applicants that expect to
	graduate from a master program of Ehime University in March 2018 or scholarship
	recipients from the Japanese Government, i.e., Monbukagakusho.]
Admission card	Please write your full name and mailing address along with postal code on a
return-mailing	stamped return envelope (362 yen stamp).
envelop	
Letter of permission	Applicants that are employed or enrolled in a doctoral program of a university or
for entrance test	college must also submit a letter of permission to take the entrance test, issued by
	the head of the institution, prepared on Form#5.
List of publications	If available, please include a list of your all relevant publications, such as book/s,
	scientific journal paper/s, lecture/s, patent registration/s, etc. on Form#6.
Residence certificate	Applicants living in Japan must also include a copy of their Residence Certificate
	issued by the town or city office of residence with the application documents.

6. Points to be Noted While Applying

(1) Research Supervisor

You must communicate in advance, at least a month before the application time, with a prospective supervisor (Professor or Associate Professor) in the field of your research interest and obtain necessary advice/suggestions towards preparing for the entrance test. If you do not understand how to select an appropriate supervisor, please contact the Educational Support Division with a brief outline of your research interest.

- (2) International students who are applying for the SPECIAL COURSE can, on occasion, receive special dispensation exempting them from the payment of examination fees, admission fees, and tuition. Please contact your potential supervisor for more details.
- (3) Preparing the Research Proposal (Plan)
 - While preparing your research proposal, please note that you will have to first write your title (i.e., research topic) and then the research objectives and methodological plan in about 1000 characters in Japanese or 250 words in English after adequately discussing the content with your prospective supervisor.
- (4) Please note we will not accept your application if the documents you send are incomplete or inadequately prepared, or consist of wrong information.
- (5) In any circumstances, change/s in the filled-in information or submitted documents will not be permitted after acceptance of the submitted application.
- (6) In case of any changes in your mailing address after the submission of application documents, we must be informed of the changes as soon as possible.
- (7) When filling the application forms, it is possible to use a computer to complete the forms. You can download the application documents from the following Ehime University homepage.
 - Ehime University homepage (https://www.ehime-u.ac.jp/) > English > Topics (See the list)

Also, you can download the application documents from typing the URL.

URL

https://www.ehime-u.ac.jp/wp-content/uploads/2017/12/rikou_D2_ryugakusei_3004_syutsugan.doc

(8) Privacy Policy (Use of personal information)

Any personal information provided in application forms such as names and addresses is solely for processing applications, contacting applicants if an application document is incomplete, conducting entrance examination, notifying successful applicants, and sending admission procedure documents. If an application document is incomplete, Ehime University may notify the applicants' institution to request the document be promptly amended and resubmitted. It is also used for academic affairs after enrollment (student registration, educational guidance), student support services (health-care management, scholarship applications), tuition administration, and to conduct surveys and research (improve entrance examinations, study and analyze application trends). The personal information will not be used for any other purpose and will not be provided to third parties.

Inquiry: Education Support Division (Engineering Team)

Ehime University

3, Bunkyo-cho, Matsuyama, 790-8577 Tel: 089-927 9697, Fax: 089-927 9694

7. Return of the Application Processing Fee

The paid amount of Application Processing Fee will be returned in the following case/s only.

- (1) The Application Processing Fee was paid, but application papers were not sent/submitted
- (2) Mistakenly paid the Application Processing Fee two or more times, or paid an amount greater than the required amount of 30,000 yen
- (3) Mistakenly paid by a Japanese Government (Monbukagakusho) scholarship recipient
- (4) Mistakenly paid by an applicant who is expecting to graduate from a master program and continue to doctoral program of this graduate school in **March 2018**.
- (5) Submitted the application documents, but the application was rejected

(Requesting for the return of the Application Processing Fee)

- In case of **condition (1) or (2)** above, please contact us at the address below. We will send you a 'Request for Return of the Application Processing Fee' form, which you will have to fill out and send back to us by post.
- In case of **condition** (3) **or** (4), however, we will send you the 'Request for Return of the Application Processing Fee' form along with your application documents, which you will have to fill out and send back to us by post.
- In case of **condition** (5), we will send the 'Request for Return of the Application Processing Fee' form along with the application documents. Please fill out the form and send it back to us by post.

Communication Address:

The External Payment Affairs Team

Financial Planning Division

Finance Department, Ehime University

10-13 Dogo-Himata, Matsuyama 790-8577, Ehime, JAPAN

Tel: +81-(0)89-927 9074

E-mail: suitou@stu.ehime-u.ac.jp

Admission and Fees

(1) Successful applicants will be directly informed about the procedure for admission formalities

- (2) Initial Fees (Admission/Tuition Fees, Miscellaneous Fees) (Note: On occasion, the admission fee and tuition for the 2017 fiscal year will be revised for the 2018 fiscal year.)
 - Admission Fee: 282,000 yen
 (Note: Admission fee is not required for the applicants that expect to graduate a master program of Ehime University in March 2018 or scholarship recipients from the Japanese Government, i.e., Monbukagakusho.)
 - 2) Tuition Fee: Annual amount 535,800 yen (Note: If a current student's tuition is revised, a new recalculated fee will be applicable.) We will inform you separately about the period of paying the tuition fee. A tuition fee is not required from scholarship recipients from Japanese Government (i.e., Monbukagakusho).
 - 3) A few thousand yen will have to be paid as miscellaneous fees, such as for accident insurance, alumni activities, etc.

(**Note**: A system to waive the Admission Fee as well as Tuition Fee is available, but it is only available to those who have excellent academic records and face economic hardship to pay these amounts or come across some special conditions such as a severe impact of natural disasters. Depending on the extent of economic hardship or impact of disasters, partial or full waiver of the above fees through necessary selection procedure is possible. Additionally, a system of late payment of the above fees is available.)

8. Miscellaneous

- (1) Request for the Application Guidelines (including the application forms) may be made by sending us (i.e., Education Support Division, Engineering Team) a self-addressed stamped (250 yen) envelope (size: 33cm ×24 cm). Please write 'Request for Doctoral Program Application Guidelines and Forms for **April 2018** Entrance' on the outer envelope with a red pen.
- (2) The submitted application documents and provided information must be complete, accurate, and authentic. Any unauthentic documents or falsely filled-in information may result in denial of admission or cancellation of the enrollment.

Watershed and Coastal Environmental Engineering

Scientific researches in the fields of river, watershed, and coastal environment are indispensable for the sustainable development of infrastructures.

Interdisciplinary educational programs and researches from physical, chemical, and ecological aspects, are provided for a better understanding and elucidation of the natural environment in river, urban/natural watershed, and coastal/nearshore areas as well as for exploring solutions against natural disasters.

Hirofumi Hinata

Development of tsunami disaster mitigation technique based on oceanographic redar and numerical simulation. Research on marine pollution caused by plastics in terms of physical oceanography.

****** Kunimitsu Inouchi

Various studies are carried out on the preservation of groundwater environment in the coastal area based on field observations and numerical simulations.

Ryo Moriwaki

Urban climate formation process, Water circulation in the basin, Utilization technology of renewable energy.

Akihiro Kadota

Turbulent flow structure in rivers and flow visualization

Kozo Watanabe

DNA taxonomy for biodiversity evaluation, Evaluation of genetic diversity of aquatic organisms, Application of DNA-based analysis in river management

Yo Miyake

Impacts of human activity on stream organisms, Conservation of stream ecosystem, Evaluation of stream environmental condition by stream organisms.

**Scheduled to retire in March, 2020

Communication Systems Engineering

The research activities cover the signal processing for high-density digital magnetic and optical recording systems, investigation of fundamental properties of subwavelength optical elements including holograms, media processing algorithms related to motion, neural networks applications to signal and image processing, sequence design and signal processing for baseband spread-spectrum communications, fractional topological invariants and topological self-similarity.

Shinji Tsuzuki

- (1) Research on sequence design and signal processing for baseband spread-spectrum communications, and its application to power-line communication
- (2) Analysis of CDMA based protocols
- (3) Developing high-definition video transmission systems over IP network

Yoshihiro Okamoto

Research on channel coding and signal processing techniques to achieve high density recording in digital information storage systems

Yasuaki Nakamura

Research on error correction coding and iterative decoding systems for information storage

Hiroyuki Ichikawa

Investigation of foundamental properties of subwavelength optical elements including holography and their application and electromagnetic analysis of light wave propagation.

,	Computer
	Science

- Applied mathematics, and basic theory and algorithms of computations in science and engineering: partial differential equations, their numerical solutions and numerical conformal mappings.
- Scientific computer simulations for natural sciences: parallel computing, high-performance computing, grid computing, performance estimation model and performance evaluation.
- 3. Information network and data processing for science and engineering. Applications of information network, software technique, distributed database.
- 4. Cognitive science: pattern cognition, human information processing.
- Applications of multimedia information, contents production, coding, processing and service systems.

Hiroshi Ito

Mathematical Physics: Mathematical scattering theory, Inverse scattering problem

Minoru Kawahara

Informatics: information networks, information and communication system, data mining, information and communication supports.

Kazuto Noguchi

Optical communication systems and applications: optical devices, optical transmission systems, telemedicine.

Hirohisa Aman

Empirical software engineering: software quality quantification using software metrics, and statistical model for quality assessment/prediction.

Kazunori Ando

Mathematical Physics: Scattering theory and inverse scattering problems for discrete Schrödinger operators on graphs

Dai Okano

Numerical Analysis: Numerical method for partial differential equations, optimizations, the method of fundamental solutions.

Hisayasu Kuroda

High performance Computing : Development of high performance numerical library, large-scale numerical simulation on multiprocessors.

œ	astrophysics.

※※ Tetsuo Irifune

Development of high-pressure technology and its application to the internal structure of the Earth.

Taku Tsuchiya

Theoretical and computational study of minerals and modeling the Earth and planetary interiors.

Hisamitsu Awaki

Study of structure and evolution of the Universe. In particular, study of active Universe through cosmic X-ray emission, and development of instruments for X-ray observatory.

Yuichi Terashima

Study of high energy phenomena in the Universe. In particular, observational study of black holes and the structure and evolution of the Universe.

Tohru Nagao

Observational studies on the formation and evolution of galaxies and supermassive black holes. Studies on the chemical evolution of the Universe.

Masanori Kameyama

Mantle Dynamics; Studies on flows, deformations, and evolutions of the Earth's interior based on the computational fluid dynamics.

Hiroaki Ohfuji

Experimental study on the phase transition, crystallization, self-organization of minerals.

Yu Nishihara

Experimental study on transport properties (such as rheology) of deep Earth materials.

Iun Tsuchiva

Computational study of the existence and its effects of volatile elements in the Earth's interior.

Tohru Shimizu

Space plasma physics, fast magnetic reconnection based on MHD and kinetic theory and numerical studies.

Masaru Kajisawa

Observational studies of galaxy formation and evolution. History of star formation and mass assembly of galaxies.

Yoshiki Matsuoka

Observational research on the evolution of galaxies, supermassive black holes, and the Universe.
